3308 / CIRCLE TECH 20

Design Atelier SEDAP

Weight

3 Kg

Orientation

HD plaster profile, CIRCLE TECH is specially designed for square recessing in drywall (ceiling / wall) on a metal frame, with a standard finishing joint.

The shallow recessing depth (60mm) allows installation in most drywall structures.

The composition of the plaster reinforced with fiberglass allows the application of any paint finishes, so as to integrate the luminaire into all types of interiors.

In GRG by Atelier SEDAP, the central disc is fixed to the plaster body by powerful magnets.

This removable disk allows easy access for maintenance of the LED driver.

Equipped with LED equipment on a rigid circuit (PCB), CIRCLE TECH offers high power by direct lighting of 2000 lumen emission source, while limiting glare by an opal diffuser (Light Output Ratio: 85%).

FINISHES

Natural plaster finish
